Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group XIII (Fig. 14) in Paper No. 9 is acknowledged. The traversal is on the ground(s) that the examiner has not addressed the two criteria for a proper restriction requirement between patentably distinct inventions. Specifically, the applicant argues the examiner has 1) failed to demonstrate the inventions are distinct as claimed and 2) failed to demonstrate there is a serious burden on the examiner. The examiner agrees the above criteria has not been applied, however the above criteria is required for a proper restriction requirement, not for a proper election of species requirement. Thus, the election of species requirement is still deemed proper and is therefore made FINAL.

2. Further, the applicant has indicated claims 1-28 and 32-33 read on elected Group XIII (Fig. 14). However, the Fig. 14 device does not include a saddle stem recited in independent claims 1, 29, and 32. Thus, only claim 33 reads on the elected species. Consequently, claims 1-32 and 34 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim.

Priority

3. If applicant desires priority under 35 U.S.C. 120 based upon a previously filed application, specific reference to the earlier filed application must be made in the instant application. For benefit claims under 35 U.S.C. 120, 121 or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of the applications. This should appear as the first sentence of the specification following the title, preferably as a separate paragraph unless it appears in an application data sheet. The status of nonprovisional parent

Art Unit: 3677

application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. ____" should follow the filing date of the parent application. If a parent application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application.

Information Disclosure Statement

4. The information disclosure statement filed 06-28-2001 fails to comply in part with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language.

Specifically, there is no explanation of relevance for German #633468 and therefore it has not been considered. All other cited references are in compliance with 37 CFR 1.97-1.98 and have been considered.

5. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Specification

6. Applicant is reminded of the proper language and format for an abstract of the disclosure. The form and legal phraseology often used in patent claims, such as "means", should be avoided.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 33 is rejected under 35 U.S.C. 102(b) as being anticipated by Clement (US#4844000).

9. Clement discloses a plastic labeling device 10 comprising a sign plate 16 and an integral saddle fitting 14. Since Clement discloses the labeling device as being formed of plastic, it appears inherent the sign plate and saddle fitting are integrally molded together, however if the molding process is not inherent, the applicant is reminded method limitations (such as molding) are given little patentable weight in an article claim as the patentability of a product does not depend on its method of production. See MPEP 2113.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
